Ogden, Utah

Mr. D. Earl Harris  
Layton, Utah

Gentlemen:

*Weber River*

At a recent meeting held in our office, we were requested to prepare a listing of the Exchange Applications which effect the use of water on the Weber and Ogden Rivers. We are enclosing a copy of this list which we feel is self-explanatory with the exception of two columns. The data listed under "New Source" indicates the source or location from which the water is to be obtained by the applicant, while the data under "Delivery Point" is the point at which the water owned by the applicant or obtained under contract from some other party will be delivered to the system to satisfy existing rights. The abbreviations "W. R." and "O. R." relate to water rights in the Weber River or the Ogden River Decrees.

We would appreciate it if each of you would check over this list carefully and then list for us all of the other Exchanges which are presently on either the Weber River or the Ogden River systems which are not on record in this office. We are not interested in those which are made on a year by year basis, but those which are of a permanent nature. You should keep in mind that only those on the enclosed list are approved exchanges and all others are being made without right.

Once you have completed your review of this matter and have given us any further information which you feel we should have, we will want to call another meeting to discuss this further.

Sincerely yours,

R. Keith Higginson  
Chief, Water Rights Branch
